Step Light

SPECIFICATIONS FEATURES

Construction

Fixture housing is made of machined brass or aluminum and finished for lasting beauty and durability. Finishes include natural brass and aluminum, black aluminum and white aluminum. Spring mounting secures fixtures tightly into walls, ceilings or display cases. Compression fitting hold fibers tightly into fixture. 1.375" (35mm) diameter.

Cabling

The SL-500 accommodates 4 strand through 75 strand EndGlow cables (see Endglow Cable spec sheet for detailed cable information)

SL502

SL503

DESCRIPTION

The **SL-500 Series Step Light** features a small, unobtrusive size, making it perfectly suited for low profile and limited space applications such as stairways and display cases. Its small size allows the light, and the object or area it illuminates to be the focus of attention. A variety of finish colors are available to suit any architectural, commercial or retail decor. The SL500 series is designed to work with EndGlow cabling.
